9. Indicative Assigned College 2017-18 ROA Funding Allocations

Paper Number: PRC4-E

9.1 Discussion

The Executive Director provided an overview of the paper which set out the proposed funding allocation framework and the criteria on which the framework is based.

He advised that he had consulted with the assigned colleges on the proposed funding allocations and that a number of meetings had taken place. He explained that a proposal was made by City of Glasgow College to extend the use of future year targets to the funding elements related to Social Inclusion Funding and Assumed Fees.

The Executive Director noted that some modelling was undertaken as to how this proposed change could be implemented. He acknowledged the potential benefits of using future year targets however noted that concerns had emerged regarding reliance on targets in areas that the region had not met forecast levels of activity in in 2015-16 and concerns around robustness of data and greater reliance on data independently provided by the three colleges meaning an increased risk of variability.

The Vice-Principal from City of Glasgow College noted her College's concerns regarding the use of historical data for Social Inclusion Funding and Assumed Fees which she claimed put City of Glasgow College at a disadvantage. She expressed that the College's position is that their concerns have not been adequately addressed. She requested to table a paper to the Committee on this matter. The Chair of the Committee noted that it was not appropriate to table a paper to a governance board without prior agreement following disclosure of the paper at earlier stages of consideration of the issue.

The Executive Director reiterated that modelling was undertaken on the proposal from City of Glasgow College with all 3 of the assigned colleges. He noted that within the paper to the Committee he had also outlined the proposal from City of Glasgow College for the Committee's consideration of the matter.

The Principal from Glasgow Kelvin College and Depute Principal from Glasgow Clyde College noted that discussions had taken place of the concerns raised by City of Glasgow College. They both stated that their respective college's position was that the use of forward looking targets would require more time to be developed and looked at strategically and that at present, data was not sufficiently robust to be used in this way.

The Principal from Glasgow Kelvin College and Depute Principal from Glasgow Clyde College agreed that a fair and transparent process had been undertaken and whilst there were elements of the funding model which they have not welcomed, they have accepted these.

9.2 Decision

The Committee **agreed to recommend** to the GCRB Board the indicative funding allocations for core teaching grant, European Social Funds, and student support funding for the assigned colleges for 2017-18 as per the funding allocation framework detailed in the paper.

The Committee **noted** the concerns raised by City of Glasgow College and **agreed** that GCRB and college management should continue to further develop regional funding approaches for future allocations, including strengthening the alignment of funding to regional strategic goals and outcomes.

The Committee **agreed** that the GCRB Executive Director should work with colleagues from the assigned colleges and the SFC to develop 2017-18 capital grant allocation recommendations for consideration at the next meeting of the Committee.
